SUMMARY

AWS Certified Solutions Architect – Associate and final-year Computer Science student with strong hands-on experience in Linux, AWS cloud infrastructure, CI/CD pipelines, and infrastructure automation. Skilled in designing scalable, highly available systems using EC2, Load Balancer, Auto Scaling, Docker, Terraform, and Jenkins. Proficient in scripting using Bash and Python to automate deployments and improve system reliability. Passionate about Platform Engineering, DevOps, and cloud-native architectures.

EDUCATION

Siksha 'O' Anusandhan University
B.Tech in Computer Science and Engineering

Bhubaneswar, India
Nov 2022 – Jun 2026

TECHNICAL SKILLS

Languages: Python, Bash, Java
Operating Systems: Linux (Ubuntu)
Databases: AWS DynamoDB, SQL
Containerization: Docker, Kubernetes
Cloud & DevOps: AWS (EC2, IAM, VPC, ALB, Auto Scaling, S3, CloudWatch), CI/CD (Jenkins, GitHub Actions)
IaC & Automation: Terraform, Ansible
Monitoring: Prometheus, Grafana, CloudWatch
Networking: TCP/IP, DNS, HTTP/HTTPS, Load Balancing, VPC, Security Groups
Version Control: Git, GitHub

PROJECTS

Cloud-Native Gamified Web Platform Deployment

AWS, Docker, Jenkins, React, Node.js, Firebase, Prometheus, Grafana, Linux

- Deployed a scalable, containerized web application using Docker Compose on AWS infrastructure.
- Implemented CI/CD automation using Jenkins, enabling continuous integration and automated deployments.
- Configured AWS Application Load Balancer and Auto Scaling to ensure high availability and fault tolerance.
- Managed secure authentication and backend services using Firebase and cloud-native architecture.
- Integrated Prometheus and Grafana for real-time monitoring, improving system observability and performance tracking.

Automated CI/CD Pipeline with Jenkins and Docker

AWS, GitHub, Jenkins, Docker, Docker Compose, Ansible, Linux

- Designed and implemented an end-to-end CI/CD pipeline using Jenkins and GitHub to automate build, test, and deployment workflows.
- Containerized applications using Docker and Docker Compose, ensuring consistent, portable, and reproducible environments.
- Automated deployment and configuration on Linux servers using Ansible, improving reliability and reducing manual effort.
- Improved release efficiency and system reliability by enabling faster, automated, and error-free deployments.

Static Website Hosting using AWS S3

AWS S3, IAM, CloudFront, Static Website Hosting

- Deployed a static website using Amazon S3 with static website hosting enabled.
- Configured bucket policies, IAM permissions, and secure public access controls.
- Implemented serverless hosting architecture, eliminating traditional server infrastructure.
- Improved scalability and availability using AWS-managed storage and global access capabilities.

CERTIFICATIONS AND ACHIEVEMENTS

AWS Certified Solutions Architect – Associate (SAA-C03)
AWS Certified Cloud Practitioner
Advanced Tools for DevOps Cohort (Dec 2024 – Mar 2025)
Secured **Top 10 Position** in SIH HackerWar 2024.
Completed HacktoberFest **2023 and 2024**.
